Professional Summary

Software Engineer with 2+ years of experience building and supporting healthcare applications using Java, Spring Boot, and Angular. Master's graduate in Computer Engineering with a cybersecurity focus and research experience in confidential computing. Developed generative AI prototypes; currently building a local agent for secure coding and CVE review. Available for freelance work via [Upwork](#).

Research and Professional Experience

CIPI, Genova, Italy

Sep 2025 – Jul 2026

Master's Thesis Researcher — Confidential Computing & Blockchain Security

Interuniversity Research Center on IT Platform Engineering

Thesis: Evaluation of Confidential Computing Technology for Attested Blockchain Services

- Developed and evaluated Intel TDX and RA-TLS prototypes for mutual attestation between cloud-hosted and operator-side services, allowing communication only after successful verification of attestation evidence.
- Developed an adapter to integrate DCSA shipment events into an existing Hyperledger Fabric logistics platform without changing its chaincode or ledger schema; validated the adapter and attested communication channel separately.

IntraCare, Texas, USA

Feb 2024 – Sep 2025

Software Engineer (Remote)

- Developed and maintained healthcare applications across Total Care Management, Patient Portal, and Road To Quality using Java, Spring Boot microservices, and Angular.
- Worked with an Agile team to develop, test, and deploy updates to AWS, troubleshoot production issues, and deliver bug fixes.
- Followed organizational HIPAA policies when handling patient data and shared information only with authorized team members.

Ericsson, Genova, Italy

Apr 2024 – Dec 2024

Research Intern

- Implemented certificate-based mutual authentication and encrypted communication between Java/Spring Boot microservices using mutual TLS (mTLS).
- Developed and maintained a custom Certificate Authority (CA) Manager to automate SSL/TLS certificate generation, renewal, and revocation.

MAC Care, Karachi

Nov 2022 – Oct 2023

Software Engineer

Subsidiary providing services to IntraCare

- Developed Java services and Angular interfaces for Patient Portal and Road To Quality.

Upwork — Multiple Clients

Jan 2021 – Dec 2024

Freelance Software Developer

- Delivered client projects spanning Java web applications, an online auction website, desktop GUI applications, and Java Swing games.
- Developed Spring and Hibernate applications and contributed to a U.S. client's Spring Boot project using the Google SDK.
- Built Java chat-server functionality, worked with C socket programming, and provided JavaScript tutoring.
- Received multiple five-star client reviews recognizing quality, communication, and timely delivery.

Education

University of Genoa (UNIGE), Genoa, Italy

Sep 2023 – Sep 2026

M.Sc. in Computer Engineering

Track: Software Platforms and Cybersecurity

Mehran University of Engineering and Technology (MUET), Jamshoro

Oct 2018 – Sep 2022

Bachelor of Engineering in Computer Systems

CGPA: 3.61/4.00

Academic and Work Projects

Generative AI Labs

Personal learning project

- Developed AI chat and text-assistant prototypes using Java, Spring Boot, Spring AI, and React, connecting the frontend to local language models through backend REST APIs and Ollama.
- Implemented text summarization, rewriting, simplification, and interview-question generation using task-specific prompts.

Local AI Agent for Secure Coding and CVE Review

In progress

Ollama, Spring AI

- Developing a local AI agent to assist with secure coding, review Common Vulnerabilities and Exposures (CVEs), and flag potential source-code vulnerabilities for developer review.

Total Care Management (TCM)

Mar 2024 – Mar 2025

- Developed and maintained Java backend services and Angular interfaces for a healthcare application used in production.

Patient Portal

Feb 2023 – Sep 2025

Remains in use at IntraCare.

- Developed and maintained appointment scheduling and patient data management features using Java, Spring Boot, and Angular.
- Built a PDF generation service for patient history forms and documents containing patient details.
- Implemented event handling using Apache Kafka and SMS notifications through Twilio.

Road To Quality

Nov 2022 – Mar 2025

- Developed and maintained patient onboarding features using Angular interfaces and Java microservices.

Fleet Tracking and Management System (Final Year Project)

Jan 2022 – Sep 2022

- Developed a fleet management system with a web administration portal (Java, HTML, CSS, JavaScript) and Android applications for users and drivers, supporting vehicle tracking, route scheduling, and real-time communication.

Skills

Languages:	Java, Python, JavaScript, TypeScript
Frameworks:	Spring Boot, Hibernate, Angular, React
Data & Integrations:	Oracle, PostgreSQL, MySQL, MongoDB, Kafka, Twilio
Cloud & Tools:	AWS, Docker, Azure, Git, Maven
AI Development:	Spring AI, Ollama, local LLM integration, prompt design; learning Agentic AI
AI Coding Tools:	Claude Code, Codex, Cursor
Security & Testing:	mTLS, SSL/TLS certificate management, Keycloak, JUnit, Postman

Publication

“An Ensemble of CNN Architectures for Early Detection of Alzheimer’s Disease Using Brain MRI.” *Mehran University Engineering & Technology Research Journal (MUETRJ)*, Oct 2023.

Certifications

- Java Development and Web Development Certification — Bell Labs, Hyderabad (Sep 2019 – Aug 2021)
- **Microsoft Technology Associate (MTA):** Programming Using Java (Jan 2020); Programming Using JavaScript (Mar 2020).

Leadership

MUET ACM Student Chapter, Jamshoro

Jun 2021 – Mar 2022

Secretary

- Coordinated chapter events and student workshops, and led student outreach activities.
