

Java. Spring Boot. Software for real needs.

I'm Muhammad Tahir Korejo. I build backend services and healthcare applications, with experience in Angular, secure service communication, and AWS deployments.

01 / SELECTED WORK

Experience, put to work.

Production applications, research prototypes, and personal projects. Each project describes my contribution.

HEALTHCARE · INTRACARE / MAC CARE

Patient Portal

Feb 2023 – Sep 2025

Appointment scheduling and patient data management features for a healthcare application.

- Developed and maintained Java / Spring Boot services and Angular interfaces.
- Built a PDF generation service for patient history forms and documents.
- Implemented event handling with Apache Kafka and SMS notifications through Twilio.

Java Spring Boot Angular Kafka Twilio

Professional work · Proprietary source code

PERSONAL PROJECT · AI

Generative AI Labs

Learning prototypes

Chat and text-assistant prototypes connecting a React frontend to local language models through REST APIs.

- Integrated Spring AI and Ollama into a Spring Boot backend.
- Implemented summarization, rewriting, simplification, and interview-question generation.

Java Spring AI React Ollama

[Explore the code on GitHub ↗](#)

Attested blockchain services

Sep 2025 – Jul 2026 · Master's thesis

Evaluated confidential computing technology for communication between cloud-hosted and operator-side services.

- Developed and evaluated Intel TDX and RA-TLS prototypes for mutual attestation.
- Built a DCSA shipment-event adapter for Hyperledger Fabric without changing chaincode or the ledger schema.

Intel TDX

RA-TLS

Hyperledger Fabric

Adapter and attested communication channel validated separately.

Microservice authentication

Apr 2024 – Dec 2024

Certificate-based mutual authentication and encrypted communication between Java / Spring Boot microservices.

- Implemented mutual TLS (mTLS) for service-to-service communication.
- Developed a custom CA Manager to automate SSL/TLS certificate generation, renewal, and revocation.

Java

Spring Boot

mTLS

SSL/TLS

Research internship project

More work

Total Care Management & Road To Quality

Professional work

Java services and Angular interfaces for healthcare management and patient onboarding.

Local AI agent for secure coding & CVE review

Developing with Ollama and Spring AI to help flag potential source-code vulnerabilities for developer review.

In progress

Fleet tracking & management system

Java web administration portal and Android apps for users and drivers: vehicle tracking, route scheduling, and real-time communication.

Final year project · 2022

Build.Collaborate.Investigate.

Experience across engineering teams, production applications, and security research.

CIPI

Sep 2025 – Jul 2026

Master's Thesis Researcher · Genoa, Italy

Confidential computing and blockchain security research at the Interuniversity Research Center on IT Platform Engineering. Intel TDX / RA-TLS prototypes and DCSA logistics-event integration.

IntraCare

Feb 2024 – Sep 2025

Software Engineer · Remote, Texas, USA

Developed and maintained Total Care Management, Patient Portal, and Road To Quality using Java, Spring Boot, and Angular. Worked with an Agile team on testing, AWS deployments, and production issue resolution.

Handled patient data in accordance with organizational HIPAA policies.

Ericsson

Apr 2024 – Dec 2024

Research Intern · Genoa, Italy

Implemented mTLS between Spring Boot microservices and developed a custom CA Manager for the SSL/TLS certificate lifecycle.

MAC Care

Nov 2022 – Oct 2023

Software Engineer · Karachi, Pakistan

Developed Java services and Angular interfaces for Patient Portal and Road To Quality. Subsidiary providing services to IntraCare.

Upwork

Jan 2021 – Dec 2024

Freelance Software Developer · Multiple clients

Delivered Java web applications, Spring / Hibernate projects, desktop interfaces, and chat-server functionality. Received multiple five-star client reviews for quality, communication, and timely delivery.

03 / TECHNICAL TOOLKIT

Backend at the core. A broader perspective.

Java and Spring Boot are central to my professional experience. Frontend development, security, and AI extend that foundation.

Backend & integrations

Java · Spring Boot · Hibernate · REST APIs ·
Maven · Kafka · Twilio

Data & cloud

PostgreSQL · Oracle · MySQL · MongoDB ·
AWS · Docker · Azure · Git

AI development

Spring AI · Ollama · Local LLM integration ·
Prompt design

Personal prototypes; currently learning agentic AI.

Frontend & languages

Angular · TypeScript · JavaScript · React ·
Python

Security & testing

mTLS · SSL/TLS · Keycloak · JUnit · Postman

AI coding tools

Claude Code · Codex · Cursor

04 / EDUCATION & RESEARCH

A strong technical foundation.

UNIVERSITY OF GENOA · UNIGE

M.Sc. in Computer Engineering

Sep 2023 – Sep 2026 · Genoa, Italy

Track: Software Platforms and Cybersecurity

MEHRAN UNIVERSITY OF ENGINEERING & TECHNOLOGY

B.E. in Computer Systems

Oct 2018 – Sep 2022 · Jamshoro, Pakistan

CGPA: 3.61 / 4.00

PUBLICATION · OCTOBER 2023

An Ensemble of CNN Architectures for Early Detection of Alzheimer's Disease Using Brain MRI

Mehran University Engineering & Technology Research Journal

[Read the publication ↗](#)

Certifications

- Java Development & Web Development — Bell Labs, Hyderabad (2019–2021)
- MTA: Programming Using Java (2020)
- MTA: Programming Using JavaScript (2020)

Leadership

Secretary, MUET ACM Student Chapter · Jun 2021 – Mar 2022. Coordinated events, student workshops, and outreach activities.

Languages

English · Intermediate (B1–B2)

Italian · Elementary (A1–A2)

Urdu · Native
